

The gold standard of accuracy in the lab industry

The Vibrant Salivary Hormones panel provides a clear view of reproductive and stress-related hormones, now enhanced with the Cortisol Awakening Response (CAR). Six daily saliva collections map cortisol and cortisone rhythms alongside estrogen, progesterone, testosterone, and DHEA-S—capturing real-life fluctuations that impact energy, mood, sleep, metabolism, and overall well-being.

Salivary Hormones Markers List

SALIVA CORTISOL

- Saliva Cortisol – Waking
- Saliva Cortisol – W +30 min.
- Saliva Cortisol – W +60 min.
- Saliva Cortisol – Evening
- Saliva Cortisol – Night
- Saliva Cortisol – Total
- Saliva Cortisol – Insomnia (Optional)

SALIVA CORTISONE

- Saliva Cortisone – Waking
- Saliva Cortisone – W +30 min.
- Saliva Cortisone – W +60 min.
- Saliva Cortisone – Evening
- Saliva Cortisone – Night
- Saliva Cortisone – Total
- Saliva Cortisone – Insomnia (Optional)

SALIVA STEROIDS HORMONES

- Estradiol (E2)
- Estrone (E1)
- Estriol (E3)
- E3/(E1+E2) Ratio
- Progesterone (Pg)
- Pg/E2 Ratio
- Testosterone
- DHEA-S
