INTRODUCTION

Vibrant Wellness is pleased to present Tickborne panel to help you make healthy lifestyle, dietary and treatment choices and aid in the diagnosis of tickborne diseases in consultation with your healthcare provider. The Vibrant Tickborne Diseases panel tests for IgG and IgM antibodies for Borreliosis/Lyme disease as well as co-infection(s) and opportunistic infections with other tick-borne illnesses along with detection of DNA of the species causing these infections.

Methodology:

The Vibrant Tickborne ImmunoChip test is a semiquantitative assay that detects IgG and IgM antibodies in human serum/DBS for the tickborne microorganisms with multiplexed chemiluminescence immunoassay (CLIA) methodology. The Tickborne PCR Test is a real-time PCR Assay based on probe-based qPCR and RT-qPCR designed for qualitative detection of infectious group-specific DNA in clinical samples.

Interpretation of Report:

The Tickborne Summary provides concise information on all organisms with representing the list of antigens with positive serology antibody titers that are outside the normal reference range and/or any detected results of the PCR testing for all analytes tested. Reference ranges have been established using a cohort of 2000 apparently healthy individuals. While the summary table provides a quick snapshot of the analytes tested, providers are encouraged to review the comments provided following the summary for a detailed description of the analytes and the tickborne interpretation guideline available in the portal.

This is followed by a complete list of all analytes tested including PCR results IgG and IgM titers for all organisms. For antibody results, the classification of Green denotes a results that is within the normal reference range, the classification of Yellow denotes a result that is moderately elevated titer with respect to the reference range and the classification of Red denotes a result that is elevated with respect to the normal reference range. Additionally, the previous value (if available) is also indicated to help check for improvements every time the test is ordered. The PCR panel reports results as Detected or Not Detected. As with all testing, results should be interpreted considering a patient's history, physical examination, and/or results of other diagnostic testing.

The Vibrant Wellness platform provides tools for you to track and analyze your general wellness profile. Testing for the Tickborne panel is performed by Vibrant America, a CLIA certified lab CLIA#:05D2078809 and Vibrant Genomics, a CLIA certified lab CLIA#: 05D2098445. Vibrant Wellness provides and makes available this report and any related services pursuant to the Terms of Use Agreement (the "Terms") on its website at www.vibrant-wellness.com. By accessing, browsing, or otherwise using the report or website or any services, you acknowledge that you have read, understood, and agree to be bound by these terms. If you do not agree to these terms, you shall not access, browse, or use the report or website. The statements in this report have not been evaluated by the Food and Drug Administration and are only meant to be lifestyle choices for potential risk mitigation. Please consult your healthcare provider for medication, treatment, diet, exercise, or lifestyle management as appropriate. This product is not intended to diagnose, treat, or cure any disease or condition. Vibrant Wellness does not provide clinical consultations for Lyme Disease treatments.

Please note:

It is important that you discuss any modifications to your diet, exercise, and nutritional supplementation with your healthcare provider before making any changes.

Tickborne Diseases 2.0 - Summary

Tickborne Diseases 2.0 - Summary

No markers are outside the normal reference range

SAMPLE

Tickborne Diseases 2.0

PCR					
Rickettsial disease PCR	Current	Previous	Rickettsial disease PCR	Current	Previous
Rickettsia rickettsii	NOT DETECTED		Rickettsia typhi	NOT DETECTED	
Powassan Virus PCR	Current	Previous	Tickborne Encephalitis Virus PCR	Current	Previous
Powassan virus	NOT DETECTED		Tickborne encephalitis virus	NOT DETECTED	
West Nile Virus PCR	Current	Previous	Chlamydomphila pneumoniae PCR	Current	Previous
West Nile Virus	NOT DETECTED		Chlamydomphila pneumoniae	NOT DETECTED	
Coxsackie Virus PCR	Current	Previous	Mycoplasma pneumoniae PCR	Current	Previous
Coxsackie Virus	NOT DETECTED		Mycoplasma pneumoniae	NOT DETECTED	

Rickettsial disease

Reference Range: In Control: ≤10 Moderate: 10.1-20 Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
Rickettsia typhi OmpB	5.2		8.6			
Rickettsia typhi Surface antigen	3.1		3.8			

Powassan Virus

Reference Range: In Control: ≤10 Moderate: 10.1-20 Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
Powassan Virus	6.0		8.7			

Tickborne Encephalitis Virus

Reference Range: In Control: ≤10 Moderate: 10.1-20 Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
Tickborne Encephalitis Virus	3.4		3.8			

West Nile Virus

Reference Range: In Control: ≤10 Moderate: 10.1-20 Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
West Nile Virus	4.1		5.5			

Chlamydomphila pneumoniae

Reference Range: In Control: ≤10 Moderate: 10.1-20 Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
Chlamydomphila pneumoniae	3.7		3.8			

Tickborne Diseases 2.0

Coxsackie Virus

Reference Range: ■ In Control: ≤ 10 ■ Moderate: 10.1-20 ■ Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
Coxsackie Virus	3.0		3.8			

Mycoplasma pneumoniae

Reference Range: ■ In Control: ≤ 10 ■ Moderate: 10.1-20 ■ Risk: >20

Test Name	IgG	Current	IgM	IgG	Previous	IgM
Mycoplasma pneumoniae	3.4		4.6			

SAMPLE

Risk and Limitations

This test has been developed and its performance characteristics determined by Vibrant America LLC., a CLIA certified lab and Vibrant Genomics, a CLIA certified lab. These assays have not been cleared or approved by the U.S. Food and Drug Administration. Vibrant Wellness provides additional contextual information on these tests and provides the report in a more descriptive fashion.

Clinical history and current symptoms of the individual must be considered by the healthcare provider prior to any interventions. Test results should be used as one component of a healthcare provider's clinical assessment.

Vibrant Tickborne panel testing is performed at Vibrant America, a CLIA and CAP certified laboratory utilizing ISO-13485 developed technology and Vibrant Genomics, a CLIA certified laboratory. Vibrant America and Vibrant Genomics have effective procedures in place to protect against technical and operational problems. However, such problems may still occur. Examples include failure to obtain the result for a specific test due to circumstances beyond Vibrant's control. Vibrant may re-test a sample to obtain these results but upon re-testing the results may still not be obtained. As with all medical laboratory testing, there is a small chance that the laboratory could report incorrect results. A tested individual may wish to pursue further testing to verify any results.

It should be realized that there are possible sources of error like any lab testing which include sample misidentification, trace contamination of PCR reactions, technical errors and rare genetic variants that may interfere with analysis.

Some individuals may feel anxious about getting their test health results. If the potential user feels very anxious, such user should speak to his or her doctor or other health care professional prior to collection of a sample for testing. Users should consult with their doctor or other health care professional if they have any questions or concerns about the results of their test or their current state of health. Users of the test are also encouraged to discuss their test results with a genetic counselor, board-certified clinical molecular geneticist, or equivalent health care professional.

The information in this report is intended for educational purposes only. While every attempt has been made to provide current and accurate information, neither the author nor the publisher can be held accountable for any errors or omissions. Tested individuals may find their experience is not consistent with Vibrant's selected peer reviewed scientific research findings of relative improvement for study groups. The science in this area is still developing and many personal health factors affect diet and health. Since subjects in the scientific studies referenced in this report may have had personal health and other factors different from those of tested individuals, results from these studies may not be representative of the results experienced by tested individuals. Further, some recommendations may or may not be attainable, depending on the tested individual's physical ability or other personal health factors. A limitation of this testing is that many of these scientific studies may have been performed in selected populations only. The interpretations and recommendations are done in the context of these studies, but the results may or may not be relevant to tested individuals of different or mixed ethnicities.

Vibrant Wellness makes no claims as to the diagnostic or therapeutic use of its tests or other informational materials. Vibrant Wellness reports and other information do not constitute medical advice and are not a substitute for professional medical advice. Please consult your healthcare practitioner for questions regarding test results, or before beginning any course of medication, supplementation, or dietary changes.
